Build in 1967 - refit 2015, Nanny 50 PS

115L Diesel, 150L Water

Our beloved Australis is a beautiful Pedro 800 OK cruiser which is practically divided to deliver its guests an unforgettable time on the water. It has comfortable berths for 4 people and is easily handled. This makes it suitable for both beginners and people with sailing experience. The Australis is fitted with a brand new engine, a twin-screw bow thruster for good control. Because of the low height this boat is able to pass through the characteristic canals of Utrecht and Amsterdam. Allowing you to get a unique experience and view inside of the historical city centers.

The Australis has multiple meanings in the astronomy. The Aurora Australis is the Southern Light, the Borealis the Northern Light. The Tania Australis is a star in the constellation of the Ursa Major. The Tania Borealis is the double star of the Tania Australis.

Bij het huren van dit schip zonder vaarervaring is het bijboeken van een vaarcursus verplicht.
